

Creating your label

1. Pick one of the design styles on this page. Please note the colours and logo used in these are just examples

2. We will change the logo to your own one

3. We will change the colours of the design to your chosen ones (eg matching your logo or brand colours)

4. We will choose a font for your design, however you can change this if you wish

5. We will amend the label address and contact details (not visible on the examples on this page) to your own

6. We will then send you an example of the label design and pot image to check. At this stage you can make final tweaks

7. When you have confirmed you are happy with the label design we will then proceed to design your remaining products and send these to Specialist Supplements
