Creating your logo

1. Pick one of the design styles on this page

2. We will change the company name to yours. We can include a tagline underneath if you wish (let us know what this should be)

3. We can change the colours - let us know what these should be, including any background or shape colours, if applicable

4. If the style you have picked includes a shape, let us know what this should be (eg. leaf), being as specific as possible

5. We can change the font if you wish, if so let us know which other one on this page you prefer

6. We will then send you your tailored logo!
